#### ART IN GARDEN MAKING

By ELIZACETH VAN BENTHUYSEN.

is shown in the parture action. comparates this little story, and get from it an idea that does not have to depend man the purse for its development. In the picture is shown one of the prettiest bits of decorative garden. I de from the bit of of the american entuncy in the center, matter sumil expense supplied the rest of the setting. Note the grouping of the built summante art with which the gardener worked in the background.

It will be seen that he has worked in masses in both directions. He has made his effect in the curved row of bulb plants merely by massing; the profuse background has been grouped much as a florist or a country bey pre-paring a bounded for his sweetheart from the wild flowers of the wood. would assemble cut flowers to get a loose and graceful arrangement. There is an absolute lack of appearance of studied effect. But the starty is there just the same. It is given to the task of getting away from the stiff arrange ment indicated by the Mother Goreo Jingle :

How does your garden grow?

Read art is always the nearest perdlike approach to nature. Nobody ever ow nature set out a lot of plants in egular form. The authoric who deigned this garden Worked to have his costing to agreemed take as nearly as withle the direction that main malit give them.

#### FOR SUCCESS WITH POULTRY

Ration of Mixed Grains for Growth Is Greatly Improved by Addition of Animal Meal.

(By C. F. BARBER.)
To give some of the most important facts connected with the poultry industry that have been settled as such, it may be said, that there can never be sticcess without elegationess; that vermin can certainly be exterminated by spraying coasts and walls with herosenot that the un chicks can be deproyed with a sital application of hert or enachine on the head and throat; yon law, seems revolutionary, that videty for laying stock must not. The "original packages" as doubt. beclurched from the extra of pullets:

Good Dry Feed Hopper.

feed better than rolled outs for the first two weeks; with milk for drink; that with all feeds, milk and meat should not be omitted; that for both growth and eggs there is no better grain, fed singly, than oats; that green bone cut fine, is the best single dement for the production of eggs, but never over one ounce a day for a hen; that a balanced ration, moistened with milk, new or skimmed, is about 25 per cent better for growth of chicks than when moistened with water, that a ration of mixed grains for growth is improved about 40 per cent by adding a proportion of about two-fifths of animal meal, or, in other words, it has been abundantly proved by the most thorough tests that growth and health will be greatly promoted by feeding a nitrogenous ration instead of a carbonaceous one; that animal meal in the ration for ducklings will make a gain of about three to one over a ration that is wholly vegetable; that over 20 per cent more food is required to make a pound of growth on a vegetable diet than with most of the evils to which poultry is ion with Dr. Kirg's" Nev's Life M. d. It was contended that he ducks and that the buying of cheap case e of the projection that the or imperfect birds with the intention

Physical Indications Are Time of Moiting, Color of Shanks and Lobes and Texture of Comb.

There are four physical indications of a hears laying condition, says O. B. Kent, poultry instructor at Cornell leve that humans couldn't university. These are the time of soil to be used. To this there ought to an invasion of liquor, it will per- melting, color of shanks, texture of comb and color of ear lebe. The first and third points apply to all breeds, the others only to those having yellow shanks and yellow ear lobes.

Good layers molt late and quickly. If you go through the flock the first could see a girl as her mot of October and pick out the bens that are just beginning to molt, or have not started, you will get most of those which are laying.

. In yellow skin breeds the paleness ber on your place which you would like of the shanks after a period of laying to convert into spot cash at the highest is a good condition of a hen's camarket price, write at once stating num- pacity. Any bird with bright yellow shanks after a year of laying may be pleked out as a good producer.

## C.C. Mengel & Bro. Co. Inc., Louisville, Ky. OBJECTS OF POULTRY SHOWS

As a Rule They Are Not Money-Making Propositions-Ald Improvement of Standard Varieties.

Poultry shows are, as a rule, not a money making proposition. They are promoted and conducted by organizations composed of poultry fanciers. who are interested in educating the public in the breeding of purebred poultry of all standard varieties. The door receipts help to pay the many cash prizes and other trophies offered to encourage the breeding of better specimens of the various varieties of our domesticated fowls. Without these exhibitions the progress of improvement in the standard varieties would be reduced to a minimum, and the poultry raisers be handicapped in their Bronchitis. Croup, Coughs and Colds, or endeavor to advance the growth of the money back. Sold and guaranteed by pure-bred poultry industry in this endeavor to advance the growth of the
